

Source: Derek Antonelli, White Pine chapter meeting 02-12-13

**Table 1.** Lichens found at Hager Lake. The scientific and common names used are the names used in USDA's Plants Database (USDA, NRCS 2012). The 1952 column indicates those species reported by Rumely (1956) during his study. The 1992 column indicates those species found by Bursik and Moseley (1992) during their study. The 2012 column indicates those species found during this study. The Herb column indicates those species for which a specimen from Hager Lake is stored at a participating Consortium of Pacific Northwest Herbaria (CPNWH 2012) facility.

Scientific Name	Common Name	1952	1992	2012	Herb
<i>Alectoria sarmentosa</i>	witch's hair lichen			X	
<i>Bryoria fremontii</i>	Fremont's horsehair lichen			X	
<i>Cladonia gracilis</i>	cup lichen			X	
<i>Lobaria pulmonaria</i>	lung lichen			X	
<i>Peltigera canina</i>	felt lichen			X	
<i>Peltigera neopolydactyla</i>	felt lichen			X	
<i>Usnea hirta</i>	beard lichen			X	

Our study was the first to include lichens in our flora list. Our list is expected to be incomplete as we had rather limited access to expertise in lichen identification.

**Table 2.** Mosses and liverworts found at Hager Lake. The scientific and common names used are the names used in USDA's Plants Database (USDA, NRCS 2012). The 1952 column indicates those species reported by Rumely (1956) during his study. The 1992 column indicates those species found by Bursik and Moseley (1992) during their study. The 2012 column indicates those species found during this study. The Herb column indicates those species for which a specimen from Hager Lake is stored at a participating Consortium of Pacific Northwest Herbaria (CPNWH 2012) facility.

Scientific Name	Common Name	1952	1992	2012	Herb
<i>Aulacomnium androgynum</i>	aulacomnium moss			X	
<i>Aulacomnium palustre</i>	aulacomnium moss			X	
<i>Calliergon stramineum</i>	calliergon moss		X	X	
<i>Catoscopium nigritum</i>	black golf club moss			X	
<i>Dicranum tauricum</i>	dicranum moss			X	
<i>Hypnum circinale</i>	hypnum moss			X	
<i>Lophozia</i> sp.	liverwort			X	
<i>Neckera</i> sp.	neckera moss			X	
<i>Pellia epiphylla</i>	overleaf pellia	X	X		
<i>Polytrichum commune</i>	polytrichum moss			X	
<i>Polytrichum juniperinum</i>	juniper polytrichum moss	X	X	X	
<i>Rhytidadelphus loreus</i>	goose neck moss			X	
<i>Sphagnum angustifolium</i>	sphagnum	X	X		
<i>Sphagnum centrale</i>	sphagnum		X		
<i>Sphagnum squarrosum</i>	sphagnum			X	
<i>Sphagnum subsecundum</i>	sphagnum	X	X	X	X
<i>Sphagnum teres</i>	sphagnum		X		

Our list of mosses and liverworts is expected to be rather incomplete as we had rather limited expertise in identification of these groups.

**Table 3. Ferns, horsetails, and lycopods found at Hager Lake.** The scientific and common names used are the names used in USDA's Plants Database (USDA, NRCS 2012). The 1952 column indicates those species reported by Rumely (1956) during his study. The 1992 column indicates those species found by Bursik and Moseley (1992) during their study. The 2012 column indicates those species found during this study. The Herb column indicates those species for which a specimen from Hager Lake is stored at a participating Consortium of Pacific Northwest Herbaria (CPNWH 2012) facility.

Scientific Name	Common Name	1952	1992	2012	Herb
<i>Athyrium filix-femina</i>	common ladyfern			X	X
<i>Botrychium lanceolatum</i> <sup>1</sup>	lanceleaf grapefern			X	
<i>Botrychium multifidum</i>	leathery grapefern			X	
<i>Botrychium virginianum</i>	rattlesnake fern			X	
<i>Cystopteris fragilis</i>	brittle bladderfern	X		X	X
<i>Dryopteris carthusiana</i> <sup>2</sup>	spinulose woodfern			X	
<i>Dryopteris cristata</i> <sup>1</sup>	crested woodfern				X
<i>Dryopteris filix-mas</i>	male fern			X	X
<i>Equisetum arvense</i>	field horsetail				X
<i>Equisetum fluviatile</i>	water horsetail	X	X		X
<i>Equisetum hyemale</i> var. <i>affine</i>	scouringrush horsetail				X
<i>Equisetum pratense</i>	meadow horsetail	X	X		X
<i>Gymnocarpium dryopteris</i> <sup>3</sup>	western oakfern	X		X	X
<i>Huperzia occidentalis</i>	western clubmoss				X
<i>Lycopodiella inundata</i> <sup>1</sup>	inundated clubmoss	X	X	X	X
<i>Lycopodium annotinum</i>	stiff clubmoss		X	X	
<i>Lycopodium clavatum</i>	running clubmoss			X	X
<i>Lycopodium dendroideum</i> <sup>1</sup>	tree groundpine			X	X
<i>Polystichum lonchitis</i>	northern hollyfern				X
<i>Pteridium aquilinum</i> var. <i>pubescens</i>	hairy brackenfern	X		X	X
<i>Selaginella densa</i>	lesser clubmoss				X
<i>Woodsia oregana</i>	Oregon cliff fern				X

<sup>1</sup> Listed as an Idaho rare plant

<sup>2</sup> May be *D. expansa* rather than *D. carthusiana*

<sup>3</sup> The name *G. disjunctum* is applied to some specimens of this oakfern

**Table 4.** Conifers found at Hager Lake. The scientific and common names used are the names used in USDA's Plants Database (USDA, NRCS 2012). The 1952 column indicates those species reported by Rumely (1956) during his study. The 1992 column indicates those species found by Bursik and Moseley (1992) during their study. The 2012 column indicates those species found during this study. The Herb column indicates those species for which a specimen from Hager Lake is stored at a participating Consortium of Pacific Northwest Herbaria (CPNWH 2012) facility.

Scientific Name	Common Name	1952	1992	2012	Herb
<i>Abies grandis</i>	grand fir	X		X

<i>Viola orbiculata</i>	darkwoods violet	X		X	X
<i>Viola palustris</i>	marsh violet	X	X	X	X

<sup>1</sup> Listed as an Idaho rare plant

<sup>4</sup> Identified specimen found as *Carex backii* from *Flora of the Pacific Northwest* (Hitchcock and Cronquist 1973) but did not distinguish from *C. saximontana* or *C. cordillerana*

<sup>5</sup> The species found was either *Carex brunneascens* or *C. laeviculmis* but could not be clearly distinguished. Selected *C. brunneascens* as best match

<sup>6</sup> Rumely (1956) reported finding *Carex saxatilis* in his vegetational plot data. Bursik and Moseley (1992) interpreted the sedge from the same area as *C. limosa*. We found *C. limosa* in this area but not *C. saxatilis*

<sup>7</sup> *Carex utriculata* has been reported from the Hager Lake area. *Flora of the Pacific Northwest* (Hitchcock 1973) treats *C. utriculata* and *C. rostrata* as the same species causing much confusion. We found the rare *C. rostrata*, but not the common *C. utriculata* during our surveys

<sup>8</sup> We found a sundew we identified as *Drosera anglica*. *D. intermedia* is a rare sundew that is very similar to *D. anglica*. We did not have the expertise to distinguish the two species. Further investigation would be appropriate

<sup>9</sup> Rumely (1956) reported finding *Epilobium densum* in his vegetational plot data. *E. densum* is an eastern species. Bursik and Moseley (1992) interpreted the willowherb as *E. palustre*

<sup>10</sup> Rumely (1956) reported finding *Juncus regelii* in his vegetational plot data. Bursik and Moseley (1992) interpreted the rush from the same area as *J. ensifolius*. We did not find any *Juncus* during our floral surveys at Hager Lake

<sup>11</sup> We found several examples of lady's tresses in different habitats during our floral surveys. We tentatively identified those as *Spiranthes romanzoffiana*, but we could not distinguish them from *S. porrifolia* or *S. diluvialis*
