Presentation: The universities in our region have pioneered the study of climate-friendly farming, and many of the same principles apply to our yards. How can we maximize carbon storage and minimize carbon emissions in our gardens? And how can we plan for the ways our native plant and pollinator assemblages may change as the climate changes?

Bertie Weddell has been teaching, consulting, and writing about conservation in the Palouse and elsewhere for several decades. She is the author of the forthcoming *Conservation in the Context of a Changing World*.

7:00 pm PST, Thursday January 19, 2023

**Join us in the Lecompte Auditorium on the 2nd floor of the
1912 Center in Moscow, Idaho**

or via ZOOM at <https://uidaho.zoom.us/j/8281785557>

Sponsored by the Idaho Native Plant Society White Pine Chapter
