

# Tree regeneration in the time of climate change

**Annual INPS Meeting and Presentation**  
**Assistant Professor Camille Stevens-Rumann**  
**Forest & Rangeland Stewardship**  
**Colorado State University**

Fires and other disturbances change our forested landscapes for years to decades into the future. Understanding how and if these forests recover is important for those impacted by these fires as well as those that enjoy these beautiful landscapes for years to come. Although fire is a natural, ecological process, recent large wildfires have raised many concerns for those in our community. We will discuss places of concern from an ecological perspective and those that are recovering well.

**Wednesday November 18, 2020**  
**Annual INPS meeting 6:30 pm PST**  
**Presentation 6:45 pm PST**

**Join us via ZOOM**
