

**Climate
Change
Effects on
Whitebark
Pine... & Other
Conifer
Com-
munities**

Thursday, February 18, 7:30 pm

1912 Center Great Room

412 East Third Street, Moscow

Marcus Warwell

Geneticist, Rocky Mountain Research Station,

will describe the contemporary climate profile of whitebark pine & other biotic communities in the Rocky Mountains, models of interactive ecological & climate change factors, & the possible future geographic distribution of conifer populations in response to global warming.

Sponsored by the White Pine Chapter of the Idaho Native Plant Society
